# Aluminum Service Entrance (SE) Cable Type SEU. XHHW-2

Service Entrance Cable, Type SE. Style SEU. Service Entrance Cable, 600 Volt. Individual Conductors Rated XHHW-2. Jacket and Individual Conductors Sunlight Resistant.

CONSTRUCTION:

- 1. Conductor: Class B compact stranded bare aluminum Alumaflex® per ASTM B800 and ASTM B801
- 2. Insulation: All phases are insulated with Cross Linked Polyethylene (XLPE) Type XHHW-2
- 3. Neutral: Bare soft annealed aluminum neutral
- 4. Binder: Reinforcement binder
- 5. Jacket: Gray Polyvinyl Chloride PVC jacket. Sunlight resistant.

### **APPLICATIONS AND FEATURES:**

Southwire® Type SE, service entrance cable is primarily used to convey power from the service drop to the meter base and from the meter base to the distribution panelboard; however, the cable may be used in all applications where Type SE cable is permitted. SEU may be used in wet or dry locations at temperatures not to exceed 90°C. Voltage rating is 600 volts. SE cables are not permitted underground, with or without a raceway, per NEC 338.12(A)(2).

#### **SPECIFICATIONS:**

- ASTM B800 8000 Series Aluminum Alloy Wire
- ASTM B801 Concentric-Lay-Stranded Conductors of 8000 Series Aluminum Alloy
- UL 44 Thermoset-Insulated Wires and Cables
- UL 854 Service Entrance Cable
- RoHS-2 (European Directive 2011/65/EU)
- NEC National Electrical Code NFPA 70
- Federal Specification A-A-59544

\* Ampacities based upon 2023 NEC Table 310.16 and do not take into account the overcurrent protection limitations in NEC 240.4(D) of 15 Amps for 14 AWG CU, 20 Amps for 12 AWG CU, and 30 Amps for 10 AWG CU (independent of the conductor temperature rating and stranding if size is present in table). Also, see NEC sections 310.15 and 110.14(C) for additional requirements.
