AAC/TW

All Aluminum Conductor. Trapezoidal Shaped Aluminum Strands. Bare

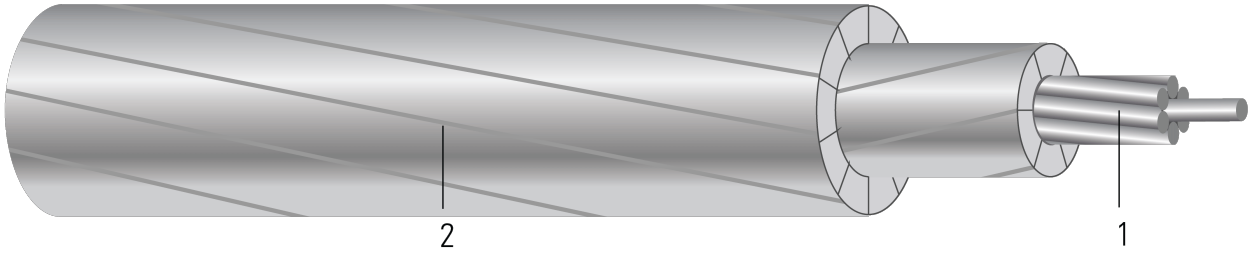

Image not to scale. See Table 1 for dimensions.

CONSTRUCTION:

1. **Conductor:** Aluminum 1350-H19 trapezoidal shaped wires, concentrically stranded.

APPLICATIONS AND FEATURES:

Shaped Wire Compact Concentric-Lay-Stranded Aluminum Conductor (AAC/TW) is designed for use as a bare overhead conductor. There are two designs of AAC/TW. One design gives an equal area of aluminum when compared to the standard AAC conductor sizes. The other design is conductor with overall outside diameters that are in fixed-increments. Use of this conductor in the equal area design allows comparable ampacity in a smaller diameter conductor when compared with standard AAC conductor. Use of this conductor in the fixed-increment diameter design allows more ampacity in an equal diameter conductor when compared with standard AAC conductor.

SPECIFICATIONS:

- ASTM B230 Aluminum, 1350-H19 Wire for Electrical Purposes
- ASTM B778 Shaped Wire Compact Concentric-Lay-Stranded Aluminum Conductors (AAC/TW)

Area Equal to Standard AAC Sizes - Weights and Measurements

Stock Number	Code Name	Size	No. of Wires	No. of Layers	Overall OD	Overall Weight
